Hazardous Weather

Today & Monday

Continued cloudy, cold, and at times damp

- **Areas of freezing fog and light freezing drizzle**
 - When: this morning and again tonight into Monday morning
 - Impacts: Reduced visibilities and icy/slick spots on roadways and other surfaces
 - Allow extra time for travel and slow down!!!

National Weather Service - Amarillo

3/1/2015 4:49 AM

The cold, cloudy conditions will hold on today and Monday, before we see a brief warm-up Tuesday ahead of another cold front. Be prepared for areas of freezing fog and light freezing drizzle this morning and again tonight into Monday morning. If driving, slow down and allow extra time to reach your destination! You'll probably want to set the alarm clocks a little early for Monday morning to give you some extra time for the drive to work or school.

Sunday Morning: Through Noon... Rain/Freezing Rain/Drizzle

National Weather Service, Norman, OK

Overview...

Light precipitation chances will continue today. Light freezing drizzle/rain will transition to rain by the afternoon as temperatures warm.

Impacts...

Roads will remain treacherous across much of the region.

Expect slick and icy secondary roads and at least slick spots on primary roads through the morning hours.

@NWSNorman

702 AM CST
Sun Mar 1 2015
National Weather Service
Norman, OK

Freezing drizzle/rain or a mix of rain and freezing drizzle/rain will persist through the late morning hours today. Thereafter, temperatures will warm enough to prevent freezing precipitation from occurring.

Hazardous Weather

A Winter Weather Advisory for freezing drizzle remains in effect until Noon for areas along and northwest of a Goldthwaite to Weatherford to Gainesville line. Otherwise, expect areas of drizzle and patchy rain to occur across the region through much of the day. Even in areas as far southeast as Lampasas, Waxahachie and Paris where temperatures have climbed to 32 degrees or higher...some icy spots will remain as the ice/snow on roads slowly melts. Be especially careful on bridges and overpasses where the icy/slushy remnants will cause a driving hazard.

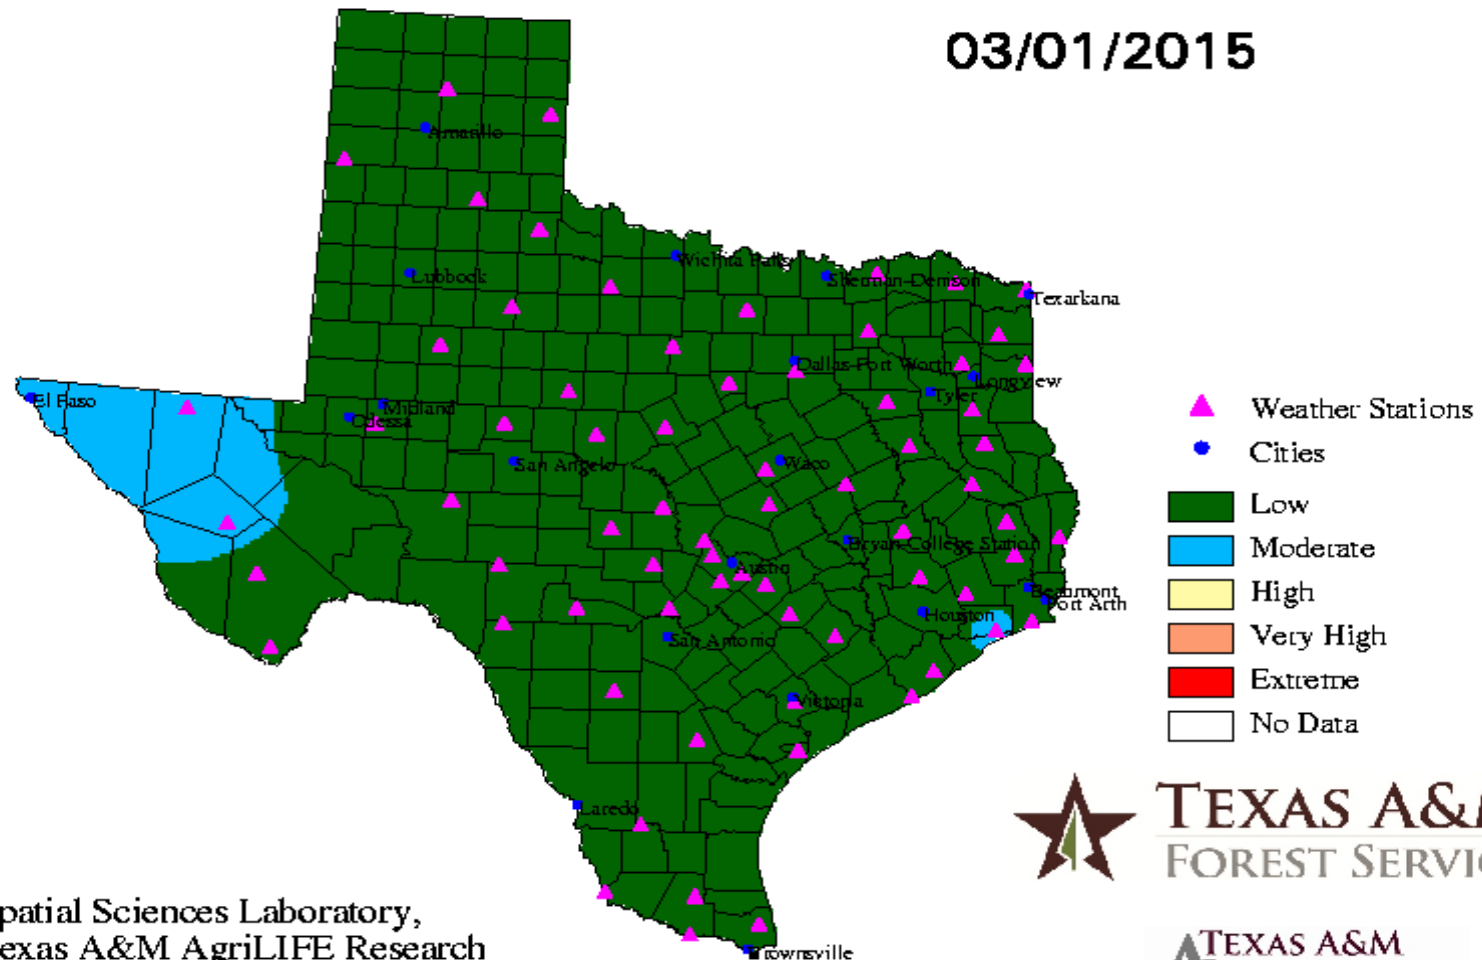

Freezing drizzle will continue through noon Sunday. This will result in hazardous travel conditions. Watch for icy spots on area roads, especially on bridges and overpasses.
